

# Monte Carlo Optimisation Engine with Acceptance Ratio Annealing: MCARA

by Nicholas Johnson and Aleksandr B. Sahakyan

**Abstract** An abstract of less than 150 words.

Introductory section which may include references in parentheses (?), or cite a reference such as ? in the text.

## Section title in sentence case

This section may contain a figure such as Figure 1.

**Figure 1:** The logo of R.

## Another section

There will likely be several sections, perhaps including code snippets, such as:

```
x <- 1:10  
result <- myFunction(x)
```

## Summary

This file is only a basic article template. For full details of *The R Journal* style and information on how to prepare your article for submission, see the [Instructions for Authors](#).
